

MEISKE PRISKILLA SAHERTIAN

Batam, Kepulauan Riau, Indonesia • meiskesahertian7@gmail.com • +62 822-8657-0147 • [linkedin.com/in/meiskesahertian](https://www.linkedin.com/in/meiskesahertian) • github.com/godlovesmei • meiske-portfolio.vercel.app

EDUCATION

State Polytechnic of Batam

Batam, Indonesia

Associate of Engineering in Informatics Engineering

Expected August 2027

GPA: 3.91 / 4.00

Relevant Coursework: Web Development, Database Systems, Software Engineering, Object-Oriented Programming, Artificial Intelligence, Human-Computer Interaction

Awards: Consistently maintained top academic performance; led multiple Project-Based Learning software development teams as a Team Leader

State Senior High School 1 Batam

Batam, Indonesia

High School Diploma

2021-2024

Participated in academic projects; graduated with a strong interest in technology and software development

PROJECTS

SignifyAI — Real-Time Deep Learning Sign Language Recognition System / *Python, TypeScript, YOLO11n, PyTorch, FastAPI, Next.js, React, Supabase (PostgreSQL), OpenCV, Tailwind CSS, Docker*

Feb 2026 – June 2026

- Fine-tuned YOLO11n object detection model on a dataset of 21,373 BISINDO hand-gesture images, achieving mAP50 of 0.995, mAP50-95 of 0.926, and test-set accuracy of ~98.86%
- Optimized real-time inference pipeline to achieve 15–25 ms latency on GPU and 80–150 ms on CPU, enabling seamless webcam-based translation of BISINDO static alphabet (A–Z) to text and speech
- Engineered a confidence-weighted voting mechanism with a 3-frame buffer and fast-commit logic to stabilize continuous video frame predictions and eliminate output flickering
- Built a full-stack platform featuring a real-time translation workspace, interactive alphabet practice modules, historical data tracking, and Web Speech API (TTS) integration for Deaf community accessibility
- Architected a scalable system orchestrating FastAPI backend and Next.js frontend via Docker Compose, with Supabase (PostgreSQL) for OAuth authentication and data management

AlgoFun — AI-Based Logic & Algorithm Learning Platform / *Laravel, FastAPI, Python, PostgreSQL, Qdrant, Redis, OpenAI API, Docker*

Sep 2025 – Jan 2026

- Engineered automated question generation using OpenAI API and Qdrant vector database with Retrieval-Augmented Generation (RAG) pipelines for curriculum-based content creation
- Designed scalable architecture combining Laravel backend services with FastAPI AI processing modules and Role-Based Access Control (RBAC) for administrators, teachers, and students
- Integrated gamification systems (XP, badges, leaderboards), achieving an average SUS usability score of 81 during User Acceptance Testing; containerized using Docker

Venus Cars — Web-Based Car Marketplace Platform / *Laravel, MySQL, Tailwind CSS, JavaScript, AJAX, Axios*

Feb 2025 – Jul 2025

- Engineered multi-role authentication and dashboards for customers and dealers, supporting end-to-end purchasing workflows for both cash and installment payment methods
- Built a dynamic vehicle catalog with advanced filtering by category, brand, and price; developed interactive credit simulation and real-time order tracking features
- Developed dealer CMS for inventory management, gallery uploads, and PDF brochure management; designed analytics dashboard to visualize sales performance and customer metrics

PureBeauty — Web-Based Skincare E-Commerce Application / *PHP, MySQL, HTML, CSS, JavaScript, Bootstrap*

Aug 2024 – Dec 2024

- Implemented secure user authentication with password encryption, relational MySQL database architecture, and category-based product search and filtering features
- Built shopping cart and checkout workflows with real-time stock validation, order tracking (Pending/Packed/Shipped/Completed), and PDF invoice generation using FPDF library
- Developed seller inventory management with full CRUD functionality, seller analytics dashboard, and responsive UI; conducted functional and Selenium automation testing

LEADERSHIP & ACTIVITIES

State Polytechnic of Batam	Batam, Indonesia
Project-Based Learning (PBL) Team Leader	Aug 2024 – Present
• Led multiple software development teams across four PBL projects, coordinating project planning, task distribution, and development timelines • Managed team communication during system development cycles; contributed to system analysis, feature planning, debugging, and project presentation preparation • Contributed to both frontend and backend development workflows across projects in web development and AI integration domains	

SKILLS & INTERESTS

Technical: PHP, Python, JavaScript, TypeScript, SQL, HTML/CSS; Frameworks: Laravel, FastAPI, Next.js, React, Bootstrap, Tailwind CSS, Axios; Databases: MySQL, PostgreSQL, Qdrant, Redis; AI/ML Libraries: PyTorch, OpenCV, YOLO

Tools: Git & GitHub, Docker, Postman, Figma, VS Code, Selenium; AI/ML: OpenAI API, PyTorch, OpenCV, YOLO, Retrieval-Augmented Generation (RAG), Vector Database Integration

Languages: Indonesian (Native); English (Intermediate Professional Working Proficiency)

Interests: Artificial Intelligence & Machine Learning, Web Application Development, Backend System Architecture, UI/UX Design, Educational Technology
